

## Marlex® HXM 50100 Polyethylene

Version 1.8

Revision Date 2023-11-27

MSDS number: AA00974-0000000431

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

Product Name : Marlex® HXM 50100 Polyethylene  
 Material : 1118576, 1018745, 1018747, 1070714, 1093199, 1080384,  
 1086319, 1018013, 1018017, 1017207, 1025207, 1018746,  
 1018748, 1019312, 1019315, 1019314, 1019313, 1019310,  
 1019311, 1018749

Recommended use of the product : Manufacture of plastics products  
 Restrictions on use : None known.

**Address** : Chevron Phillips Chemical Company LP

**MEDICAL APPLICATION CAUTION:** Do not use this material in medical applications involving permanent implantation in the human body or permanent contact with internal body fluids or tissues fluids or tissues.

Do not use this material in medical applications involving brief or temporary implantation in the human body or contact with internal body fluids or tissues unless the material has been provided directly from Chevron Phillips Chemical Company LP or its legal affiliates under an agreement which expressly acknowledges the contemplated use.

**Marlex® HXM 50100 Polyethylene**

Version 1.8

Revision Date 2023-11-27

Chevron Phillips Chemical Company LP and its legal affiliates makes no representation, promise, express warranty or implied warranty concerning the suitability of this material for use in implantation in the human body or in contact with internal body fluids or tissues.

**SECTION 2: Hazards identification****Hazard classification**

Standards for classification and labeling of chemical substances and material safety data sheet (ministry of employment and labor public notice No. 2023-9)

**Classification**

Not applicable

**Warning label elements including precautionary statements**

Symbol(s) :  
 Signal Word : Not applicable  
 Hazard Statements : Not applicable  
 Precautionary Statements : Not applicable

Other hazards which do not result in classification : None

**SECTION 3: Composition/information on ingredients**

Common name	Synonyms	CAS-No.	Concentration	KECI Number
Polyethylene Hexene Copolymer	Polyethylene Hexene Copolymer	25213-02-9	99 % - 100%	KE-13670

**SECTION 4: First aid measures**

In case of eye contact : In the case of contact with eyes, rinse immediately with plenty

Number:100000000792

3/14

**Marlex® HXM 50100 Polyethylene**

Version 1.8

Revision Date 2023-11-27

- of water and seek medical advice.
- In case of skin contact : If the molten material gets on skin, quickly cool in water. Seek immediate medical attention. Do not try to peel the solidified material from the skin or use solvents or thinners to dissolve it.
- If inhaled : Move to fresh air in case of accidental inhalation of dust or fumes from overheating or combustion. If symptoms persist, call a physician.
- If swallowed : Do not induce vomiting without medical advice.

**Other cautions for Doctors**

- Symptoms : No data available.
- Risks : No data available.
- Treatment : No data available.

**SECTION 5: Firefighting measures**

- Flash point : No data available
- Autoignition temperature : No data available
- Suitable extinguishing media : Water. Water mist. Dry chemical. Carbon dioxide (CO<sub>2</sub>). Foam. If possible, water should be applied as a spray from a fogging nozzle since this is a surface burning material. The application of high velocity water will spread the burning surface layer. Avoid the use of straight streams that may create a dust cloud and the risk of a dust explosion. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
- Specific hazards during fire fighting : Risks of ignition followed by flame propagation or secondary explosions can be caused by the accumulation of dust, e.g. on floors and ledges.
- Special protective equipment for fire-fighters : Use personal protective equipment. Wear self-contained breathing apparatus for firefighting if necessary.
- Further information : This material will burn although it is not easily ignited.
- Fire and explosion protection : Treat as a solid that can burn. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.
- Hazardous decomposition : Normal combustion forms carbon dioxide, water vapor and may

**Marlex® HXM 50100 Polyethylene**

Version 1.8

Revision Date 2023-11-27

products produce carbon monoxide, other hydrocarbons and hydrocarbon oxidation products (ketones, aldehydes, organic acids) depending on temperature and air availability. Incomplete combustion can also produce formaldehyde.

**SECTION 6: Accidental release measures**

Personal precautions : Sweep up to prevent slipping hazard. Avoid breathing dust. Avoid dust formation.

Environmental precautions : Do not contaminate surface water. Prevent product from entering drains.

Methods for cleaning up : Clean up promptly by sweeping or vacuum.

Additional advice : Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air).

**SECTION 7: Handling and storage****Handling**

Advice on safe handling : Use good housekeeping for safe handling of the product. Keep out of water sources and sewers. Spilled pellets may create a slipping hazard. Electrostatic charge may accumulate and create a hazardous condition when handling this material. To minimize this hazard, bonding and grounding may be necessary, but may not by themselves be sufficient. At elevated temperatures (>350°F, >177°C), polyethylene can release vapors and gases, which are irritating to the mucous membranes of the eyes, mouth, throat, and lungs. These substances may include acetaldehyde, acetone, acetic acid, formic acid, formaldehyde and acrolein. Based on animal data and limited epidemiological evidence, formaldehyde has been listed as a carcinogen. Following all recommendations within this SDS should minimize exposure to thermal processing emissions.

Advice on protection against fire and explosion : Treat as a solid that can burn. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.

**Secure storage**

Requirements for storage areas and containers : Keep in a dry place. Keep in a well-ventilated place.

**Marlex® HXM 50100 Polyethylene**

Version 1.8

Revision Date 2023-11-27

- Uses advised against : None known.
- Advice on common storage : Do not store together with oxidizing and self-igniting products.
- Specific Use : Manufacture of plastics products

**SECTION 8: Exposure controls/personal protection****Chemical exposure standards, biological exposure standards, etc.**

Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.

**Personal protective equipment**

- Respiratory protection : No respiratory protection is normally required. If heated material generates vapor or fumes that are not adequately controlled by ventilation, wear an appropriate respirator. Use the following elements for air-purifying respirators: Organic Vapor and Formaldehyde. A positive pressure, air-supplying respirator may be appropriate if there is potential for uncontrolled release, aerosolization, exposure levels are not known, or other circumstances where air-purifying respirators may not provide adequate protection.  
Dust safety masks are recommended when the dust concentration is excessive.
- Eye protection : Use of safety glasses with side shields for solid handling is good industrial practice. If this material is heated, wear chemical goggles or safety glasses with side shields or a face shield. If there is potential for dust, use chemical goggles.
- Skin and body protection : At ambient temperatures use of clean and protective clothing is good industrial practice. If the material is heated or molten, wear thermally insulated, heat-resistant gloves that are able to withstand the temperature of the molten product. If this material is heated, wear insulated clothing to prevent skin contact if engineering controls or work practices are not adequate.

**SECTION 9: Physical and chemical properties****Information on basic physical and chemical properties**

## Appearance

- Physical state : solid
- Color : Opaque
- Odor : Mild to no odor
- Odor Threshold : No data available

Number:100000000792

6/14

**Marlex® HXM 50100 Polyethylene**

Version 1.8

Revision Date 2023-11-27

pH	:	Not applicable
Melting point/range	:	90-140°C (194-284°F)
Melting point/freezing point	:	Not applicable
Initial boiling point and boiling range	:	Not applicable
Flash point	:	No data available
Evaporation rate	:	Not applicable
Flammability (solid, gas)	:	No data available
Lower explosion limit	:	Not applicable
Upper explosion limit	:	Not applicable
Vapor pressure	:	Not applicable
Solubility	:	negligible
Relative density	:	Not applicable
Density	:	0.91 - 0.97 g/cm <sup>3</sup> Please refer to the Technical Data Sheet (TDS) for more detailed information relating to the nominal physical properties, including density, of this polyethylene resin grade.
Vapor density	:	Not applicable
Partition coefficient: n-octanol/water	:	No data available
Autoignition temperature	:	No data available
Decomposition temperature	:	Low molecular weight hydrocarbons, alcohols, aldehydes, acids and ketones can be formed during thermal processing.
Viscosity, kinematic	:	Not applicable
Solubility in other solvents	:	No data available
Viscosity, dynamic	:	Not applicable

**SECTION 10: Stability and reactivity**

Number:100000000792

7/14

**Marlex® HXM 50100 Polyethylene**

Version 1.8

Revision Date 2023-11-27

- Reactivity** : This material is considered non-reactive under normal ambient and anticipated storage and handling conditions of temperature and pressure.
- Chemical stability** : This material is considered stable under normal ambient and anticipated storage and handling conditions of temperature and pressure.
- Possibility of hazardous reactions**
- Conditions to avoid** : Avoid prolonged storage at elevated temperature.
- Materials to avoid** : Avoid contact with strong oxidizing agents.
- Thermal decomposition** : Low molecular weight hydrocarbons, alcohols, aldehydes, acids and ketones can be formed during thermal processing.
- Hazardous decomposition products** : Normal combustion forms carbon dioxide, water vapor and may produce carbon monoxide, other hydrocarbons and hydrocarbon oxidation products (ketones, aldehydes, organic acids) depending on temperature and air availability. Incomplete combustion can also produce formaldehyde.
- Other data** : No decomposition if stored and applied as directed.

**SECTION 11: Toxicological information****Information on exposure routes****Marlex® HXM 50100 Polyethylene****Acute oral toxicity** : Presumed Not Toxic**Marlex® HXM 50100 Polyethylene****Acute inhalation toxicity** : Presumed Not Toxic**Marlex® HXM 50100 Polyethylene****Acute dermal toxicity** : Presumed Not Toxic**Marlex® HXM 50100 Polyethylene****Skin corrosion or irritation** : No skin irritation**Marlex® HXM 50100 Polyethylene****Eye corrosion or irritation** : No eye irritation**Marlex® HXM 50100 Polyethylene**

**Marlex® HXM 50100 Polyethylene**

Version 1.8

Revision Date 2023-11-27

**Respiratory Sensitization** : Did not cause sensitization on laboratory animals.

**Marlex® HXM 50100 Polyethylene**  
**Skin sensitization** : No data available

**Marlex® HXM 50100 Polyethylene**  
**Repeated dose toxicity** : No data available

**Marlex® HXM 50100 Polyethylene**  
**Germ cell mutagenicity (in vitro)** : Remarks: No data available  
**Specific Target Organ Toxicity (Single Exposure)**

No adverse effects expected

**Specific Target Organ Toxicity (Repeated Exposure)**

No adverse effects expected

**Marlex® HXM 50100 Polyethylene**  
**Further information** : This product contains POLYMERIZED OLEFINS. During thermal processing (>350°F, >177°C) polyolefins can release vapors and gases (aldehydes, ketones and organic acids) which are irritating to the mucous membranes of the eyes, mouth, throat, and lungs. Generally these irritant effects are all transitory. However, prolonged exposure to irritating off-gases can lead to pulmonary edema. Formaldehyde (an aldehyde) has been classified as a carcinogen based on animal data and limited epidemiological evidence.

**SECTION 12: Ecological information**

Ecological Toxicity

**Persistence and degradability** : This material is not expected to be readily biodegradable.  
 Persistence and degradability

**Bioaccumulative** : Does not bioaccumulate.

Number:100000000792

9/14

**Marlex® HXM 50100 Polyethylene**

Version 1.8

Revision Date 2023-11-27

- Mobility : The product is insoluble and floats on water.
- Other adverse effects : This material is not expected to be harmful to aquatic organisms., Fish or birds may eat pellets which may obstruct their digestive tracts.

**Ecotoxicology Assessment**

- Short-term (acute) aquatic hazard : This product has no known ecotoxicological effects.
- Long-term (chronic) aquatic hazard : This product has no known ecotoxicological effects.

**SECTION 13: Disposal considerations**

The information in this SDS pertains only to the product as shipped.

Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by US EPA under RCRA (40 CFR 261) or other State and local regulations. Measurement of certain physical properties and analysis for regulated components may be necessary to make a correct determination. If this material is classified as a hazardous waste, federal law requires disposal at a licensed hazardous waste disposal facility.

**SECTION 14: Transport information**

**The shipping descriptions shown here are for bulk shipments only, and may not apply to shipments in non-bulk packages (see regulatory definition).**

Consult the appropriate domestic or international mode-specific and quantity-specific Dangerous Goods Regulations for additional shipping description requirements (e.g., technical name or names, etc.) Therefore, the information shown here, may not always agree with the bill of lading shipping description for the material. Flashpoints for the material may vary slightly between the SDS and the bill of lading.

UN Number	:	not regulated
UN Product Shipping Name	:	Not regulated as a dangerous good
Hazard Class	:	Not applicable
Packing Group	:	Not applicable
Marine Pollutant	:	Not applicable
Special Safety Measures on Mode of Transport	:	No data available

**US DOT (UNITED STATES DEPARTMENT OF TRANSPORTATION)**
