

### Marlex® 9004 Polyethylene

Version 1.11

Revision Date 2024-06-06

According to Regulation (EC) No. 1907/2006, Regulation (EC) No. 2020/878

SECTION 1: Identification of the substance/mixture and of the company/undertaking

### 1.1 Product identifier

### **Product information**

Material : 1108 1108	x® 9004 Polyethylene 28, 1108127, 1108126, 1108125, 1108123, 1108122, 24, 1038073, 1038049, 1038047, 1040831, 1038070, 064, 1038063, 1038057, 1038039, 1038041, 1038054, 330
-------------------------	--

### **EC-No.Registration number**

Chemical name	CAS-No. EC-No. Index No.	Legal Entity Registration number
Ethylene	74-85-1 200-815-3 601-010-00-3	Chevron Phillips Chemical Company LP 01-2119462827-27-0004
Ethylene	74-85-1 200-815-3 601-010-00-3	Chevron Phillips Chemicals International NV 01-2119462827-27-0271
1-Hexene	592-41-6 209-753-1	Chevron Phillips Chemical Company LP 01-2119475505-34-0005
1-Hexene	592-41-6 209-753-1	Chevron Phillips Chemicals International NV 01-2119475505-34-0021

### 1.2

Relevant identified uses of the substance or mixture and uses advised against

Relevant Identified Uses Supported	:	Manufacture of plastics products
Cappontoa		

1.3

Details of the supplier of the safety data sheet

Company	:	Chevron Phillips Chemical Company LP 10001 Six Pines Drive The Woodlands, TX 77380
Local	:	Chevron Phillips Chemicals International N.V. Airport Plaza (Stockholm Building)

MEDICAL APPLICATION CAUTION: Do not use this material in medical applications involving permanent implantation in the human body or permanent contact with internal body fluids or tissues fluids or tissues.

Do not use this material in medical applications involving brief or temporary implantation in the human body or contact with internal body fluids or tissues unless the material has been provided directly from Chevron Phillips Chemical Company LP or its legal affiliates under an agreement which expressly acknowledges the contemplated use.

Chevron Phillips Chemical Company LP and its legal affiliates makes no representation, promise, express warranty or implied warranty concerning the suitability of this material for use in implantation in the human body or in contact with internal body fluids or tissues.

### **SECTION 2: Hazards identification**

### 2.1

# Classification of the substance or mixture REGULATION (EC) No 1272/2008

Not a hazardous substance or mixture according to Regulation (EC) No 1272/2008.

### 2.2

### Labeling (REGULATION (EC) No 1272/2008)

Not a hazardous substance or mixture according to Regulation (EC) No 1272/2008.

### 2.3

Other hazards Results of PBT and vPvB assessment	: This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.
Endocrine disrupting properties	: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

### SECTION 3: Composition/information on ingredients

### 3.1 - 3.2

### Substance or Mixture

		SAFETY DATA SHEET
Ма	rlex® 9004 Polyethyle	ene
Ver	sion 1.11	Revision Date 2024-06-06
5.2	<b>Special hazards arising from</b> Specific hazards during fire : fighting	
5.3	Advice for firefighters Special protective : equipment for fire-fighters	Use personal protective equipment. Wear self-contained breathing apparatus for firefighting if necessary.
	Further information :	This material will burn although it is not easily ignited.
	Fire and explosion : protection	Treat as a solid that can burn. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.
	Hazardous decomposition : products	Normal combustion forms carbon dioxide, water vapor and may produce carbon monoxide, other hydrocarbons and hydrocarbon oxidation products (ketones, aldehydes, organic acids) depending on temperature and air availability. Incomplete combustion can also produce formaldehyde.
SEC	CTION 6: Accidental release me	easures
6.1	Personal precautions, protec	tive equipment and emergency procedures
~ ~	Personal precautions :	Sweep up to prevent slipping hazard. Avoid breathing dust. Avoid dust formation.
6.2	Environmental precautions	
	Environmental precautions :	Do not contaminate surface water. Prevent product from entering drains.
6.3	Methods and materials for co	ntainment and cleaning up
	Methods for cleaning up :	Clean up promptly by sweeping or vacuum.
	Additional advice :	Dust deposits should not be allowed to accumulate on

### Additional advice : Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air). 6.4 Reference to other sections

# Reference to other sections : For personal protection see section 8. For disposal considerations see section 13.

### **SECTION 7: Handling and storage**

### 7.1

# Precautions for safe handling Handling

Advice on safe handling	: Use good housekeeping for safe handling of the product. Keep

			out of water sources and sewers. Spilled pellets may create a slipping hazard. Electrostatic charge may accumulate and create a hazardous condition when handling this material. To minimize this hazard, bonding and grounding may be necessary, but may not by themselves be sufficient. At elevated temperatures (>350°F, >177°C), polyethylene can release vapors and gases, which are irritating to the mucous membranes of the eyes, mouth, throat, and lungs. These substances may include acetaldehyde, acetone, acetic acid, formic acid, formaldehyde and acrolein. Based on animal data and limited epidemiological evidence, formaldehyde has been listed as a carcinogen. Following all recommendations within this SDS should minimize exposure to thermal processing emissions.
	Advice on protection against fire and explosion	:	Treat as a solid that can burn. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.
7.2	Conditions for safe storage	, ir	ncluding any incompatibilities
	Storage		
	Requirements for storage areas and containers	:	Keep in a dry place. Keep in a well-ventilated place.
	Advice on common storage	:	Do not store together with oxidizing and self-igniting products.
	German storage class	:	Combustible Solids
'.3	<b>Specific End Use</b> Use	:	Manufacture of plastics products
SE(	CTION 8: Exposure controls/	per	sonal protection
8.2	Exposure controls Engineering measures		
	Consider the potential hazard		of this material (see Section 2), applicable exposure limits, job
	activities, and other substance personal protective equipment exposure to harmful levels of recommended. The user sho	nt. thi: oulc	
	activities, and other substance personal protective equipment exposure to harmful levels of recommended. The user sho	nt. thi: oulc on i:	I read and understand all instructions and limitations supplied with s usually provided for a limited time or under certain circumstances.
	activities, and other substanc personal protective equipmen exposure to harmful levels of recommended. The user sho the equipment since protection	nt. thi: oulc on i:	If engineering controls or work practices are not adequate to preven s material, the personal protective equipment listed below is I read and understand all instructions and limitations supplied with s usually provided for a limited time or under certain circumstances.

rsion 1.11	Revision Date 2024-06-0
	respirator may be appropriate if there is potential for uncontrolled release, aerosolization, exposure levels are not known, or other circumstances where air-purifying respirators may not provide adequate protection. Dust safety masks are recommended when the dust concentration is excessive.
Eye protection	: Use of safety glasses with side shields for solid handling is good industrial practice. If this material is heated, wear chemical goggles or safety glasses with side shields or a face shield. If there is potential for dust, use chemical goggles.
Skin and body protection	: At ambient temperatures use of clean and protective clothing is good industrial practice. If the material is heated or molten, wear thermally insulated, heat-resistant gloves that are able to withstand the temperature of the molten product. If this material is heated, wear insulated clothing to prevent skin contact if engineering controls or work practices are not adequate.

SAFETY DATA SHEET

Version 1.11

Revision Date 2024-06-06

### 11.2

11.2	Information on other hazards	;	
	Marlex® 9004 Polyethylene Further information	:	This product contains POLYMERIZED OLEFINS. During thermal processing (>350°F, >177°C) polyolefins can release vapors and gases (aldehydes,ketones and organic acids) which are irritating to the mucous membranes of the eyes, mouth, throat, and lungs. Generally these irritant effects are all transitory. However, prolonged exposure to irritating off-gases can lead to pulmonary edema. Formaldehyde (an aldehyde) has been classified as a carcinogen based on animal data and limited epidemiological evidence.
	Endocrine disrupting properties	:	The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.
SEC	TION 12: Ecological informati	ior	1
12.1	Toxicity		
I	Ecotoxicity effects		
	Toxicity to fish	:	Not a hazardous substance or mixture.
12.2	Persistence and degradabilit	у	
	Biodegradability	:	This material is not expected to be readily biodegradable.
12.3	<b>Bioaccumulative potential</b> Elimination information (persisted	en	ce and degradability)
	Bioaccumulation	:	Does not bioaccumulate.
12.4	Mobility in soil		
	Mobility	:	The product is insoluble and floats on water.
12.5	Results of PBT and vPvB ass Results of PBT assessment		This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.
12.6	Endocrine disrupting propert	ie	S
			<b>-</b>

Endocrine disrupting	: The substance/mixture does not contain components

properties	considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.					
12.7 Other adverse effects						
Additional ecological information	: This material is not expected to be harmful to aquatic organisms., Fish or birds may eat pellets which may obstruct their digestive tracts.					
12.8 Additional Information						
Ecotoxicology Assessment						
Short-term (acute) aquatic hazard	: This material is not expected to be harmful to aquatic organisms.					
Long-term (chronic) aquatic hazard	: This material is not expected to be harmful to aquatic organisms.					
SECTION 13: Disposal considerations						
13.1 Waste treatment methods The information in this SDS p	ertains only to the product as shipped.					

Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by US EPA under RCRA (40 CFR 261) or other State and local regulations. Measurement of certain physical properties and analysis for regulated components may be necessary to make a correct determination. If this material is classified as a hazardous waste, federal law requires disposal at a licensed hazardous waste disposal facility.

### **SECTION 14: Transport information**

### 14.1 - 14.7

### Transport information

The shipping descriptions shown here are for bulk shipments only, and may not apply to shipments in non-bulk packages (see regulatory definition).

Consult the appropriate domestic or international mode-specific and quantity-specific Dangerous Goods Regulations for additional shipping description requirements (e.g., technical name or names, etc.) Therefore, the information shown here, may not always agree with the bill of lading shipping description for the material. Flashpoints for the material may vary slightly between the SDS and the bill of lading.

# Marlex® 9004 Polyethylene

Version 1.11

Revision Date 2024-06-06

	Chemicals Association		
EINECS	European Inventory of Existing Chemical Substances	PICCS	Philippines Inventory of Commercial Chemical Substances
MAK	Germany Maximum Concentration Values	PRNT	Presumed Not Toxic
GHS	Globally Harmonized System	RCRA	Resource Conservation Recovery Act
>=	Greater Than or Equal To	STEL	Short-term Exposure Limit
IC50	Inhibition Concentration 50%	SARA	Superfund Amendments and Reauthorization Act.
IARC	International Agency for Research on Cancer	TLV	Threshold Limit Value
IECSC	Inventory of Existing Chemical Substances in China	TWA	Time Weighted Average
ENCS	Japan, Inventory of Existing and New Chemical Substances	TSCA	Toxic Substance Control Act
KECI	Korea, Existing Chemical Inventory	UVCB	Unknown or Variable Composition, Complex Reaction Products, and Biological Materials
<=	Less Than or Equal To	WHMIS	Workplace Hazardous Materials Information System
LC50	Lethal Concentration 50%	ATE	Acute toxicity estimate
