MEDICAL APPLICATION CAUTION: Do not use this material in medical applications involving permanent implantation in the human body or permanent contact with internal body fluids or tissues fluids or tissues.

Do not use this material in medical applications involving brief or temporary implantation in the human body or contact with internal body fluids or tissues unless the material has been provided directly from Chevron Phillips Chemical Company LP or its legal affiliates under an agreement which expressly acknowledges the contemplated use.

Chevron Phillips Chemical Company LP and its legal affiliates makes no representation, promise, express warranty or implied warranty concerning the suitability of this material for use in implantation in the human body or in contact with internal body fluids or tissues.

## **SECTION 2: Hazards identification**

2.1

# Classification of the substance or mixture REGULATION (EC) No 1272/2008

Not a hazardous substance or mixture according to Regulation (EC) No 1272/2008.

## 2.2

## Labeling (REGULATION (EC) No 1272/2008)

Not a hazardous substance or mixture according to Regulation (EC) No 1272/2008.

## 2.3

# Other hazards<br/>Results of PBT and vPvB<br/>assessment: This substance/mixture contains no components considered to<br/>be either persistent, bioaccumulative and toxic (PBT), or very<br/>persistent and very bioaccumulative (vPvB) at levels of 0.1%<br/>or higher.Endocrine disrupting<br/>properties: The substance/mixture does not contain components<br/>considered to have endocrine disrupting properties according<br/>to REACH Article 57(f) or Commission Delegated regulation<br/>(EU) 2017/2100 or Commission Regulation (EU) 2018/605 at<br/>levels of 0.1% or higher.

## SECTION 3: Composition/information on ingredients

# 3.1 - 3.2

Substance or Mixture

Contains no hazardous ingredients according to GHS. :					

# SECTION 4: First aid measures

# 4.1

4.1	Description of first-aid mea	asu	res
	If inhaled	:	Move to fresh air in case of accidental inhalation of dust or fumes from overheating or combustion. If symptoms persist, call a physician.
	In case of skin contact	:	If the molten material gets on skin, quickly cool in water. Seek immediate medical attention. Do not try to peel the solidified material from the skin or use solvents or thinners to dissolve it.
	In case of eye contact	:	In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
	If swallowed	:	Do not induce vomiting without medical advice.
4.2	Most important symptoms a Notes to physician	and	l effects, both acute and delayed
	Symptoms	:	No data available.
4.3	Risks Indication of any immediate	: • m	No data available. edical attention and special treatment needed
	Treatment	:	No data available.
SEC	CTION 5: Firefighting measu	res	
	Flash point	:	No data available
	Autoignition temperature	:	No data available
5.1	Extinguishing media		
	Suitable extinguishing media	:	Water. Water mist. Dry chemical. Carbon dioxide (CO2). Foam. If possible, water should be applied as a spray from a
			fogging nozzle since this is a surface burning material. The application of high velocity water will spread the burning surface layer. Avoid the use of straight streams that may create a dust cloud and the risk of a dust explosion. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
SDS	S Number:10000000586		application of high velocity water will spread the burning surface layer. Avoid the use of straight streams that may create a dust cloud and the risk of a dust explosion. Use extinguishing measures that are appropriate to local

SDS Number:10000000586

Version 1.10

SAFETY DATA SHEET

# 5.2

5.2			
	Special hazards arising from Specific hazards during fire fighting	n tl :	he substance or mixture Risks of ignition followed by flame propagation or secondary explosions can be caused by the accumulation of dust, e.g. on floors and ledges.
5.3	Advice for firefighters Special protective equipment for fire-fighters	:	Use personal protective equipment. Wear self-contained breathing apparatus for firefighting if necessary.
	Further information	:	This material will burn although it is not easily ignited.
	Fire and explosion protection	:	Treat as a solid that can burn. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.
	Hazardous decomposition products	:	Normal combustion forms carbon dioxide, water vapor and may produce carbon monoxide, other hydrocarbons and hydrocarbon oxidation products (ketones, aldehydes, organic acids) depending on temperature and air availability. Incomplete combustion can also produce formaldehyde.
SEC	CTION 6: Accidental release r	me	asures
6.1			
0.1	Personal precautions, prote	ecti	ve equipment and emergency procedures
6.2	Personal precautions	:	Sweep up to prevent slipping hazard. Avoid breathing dust. Avoid dust formation.
0.2	Environmental precautions		
	Environmental precautions	:	Do not contaminate surface water. Prevent product from entering drains.
6.3			
	Methods and materials for of Methods for cleaning up	con:	itainment and cleaning up Clean up promptly by sweeping or vacuum.
	Additional advice	:	Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air).
6.4	Reference to other sections	5	
	Reference to other sections	:	For personal protection see section 8. For disposal considerations see section 13.
SEC	CTION 7: Handling and storage	ge	
7.1	Precautions for safe handlin Handling	ng	

5/14

		SAFETY DATA SHEET
Marlex® 9005 Polyethy	/le	
Version 1.10		Revision Date 2024-06-06
Advice on safe handling	:	Use good housekeeping for safe handling of the product. Keep out of water sources and sewers. Spilled pellets may create a slipping hazard. Electrostatic charge may accumulate and create a hazardous condition when handling this material. To minimize this hazard, bonding and grounding may be necessary, but may not by themselves be sufficient. At elevated temperatures (>350°F, >177°C), polyethylene can release vapors and gases, which are irritating to the mucous membranes of the eyes, mouth, throat, and lungs. These substances may include acetaldehyde, acetone, acetic acid, formic acid, formaldehyde and acrolein. Based on animal data and limited epidemiological evidence, formaldehyde has been listed as a carcinogen. Following all recommendations within this SDS should minimize exposure to thermal processing emissions.
Advice on protection against fire and explosion	:	Treat as a solid that can burn. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.
7.2 Conditions for safe storage	ə, ir	ncluding any incompatibilities
Storage		
Requirements for storage areas and containers	:	Keep in a dry place. Keep in a well-ventilated place.
Advice on common storage	:	Do not store together with oxidizing and self-igniting products.
German storage class	:	Combustible Solids
7.3 Specific End Use Use	:	Manufacture of plastics products
SECTION 8: Exposure controls/	per	rsonal protection
8.2 Exposure controls Engineering measures		
activities, and other substand personal protective equipment exposure to harmful levels of recommended. The user sho	ces nt. f this ould	of this material (see Section 2), applicable exposure limits, job in the work place when designing engineering controls and selecting If engineering controls or work practices are not adequate to prevent s material, the personal protective equipment listed below is d read and understand all instructions and limitations supplied with s usually provided for a limited time or under certain circumstances.
Personal protective equipn	nen	ıt
Respiratory protection	:	No respiratory protection is normally required. If heated material generates vapor or fumes that are not adequately

material generates vapor or fumes that are not adequately controlled by ventilation, wear an appropriate respirator. Use the following elements for air-purifying respirators: Organic

6/14

SDS Number:10000000586

arlex® 9005 Polyeth	lene
ersion 1.10	Revision Date 2024-06-0
	Vapor and Formaldehyde. A positive pressure, air-supplying respirator may be appropriate if there is potential for uncontrolled release, aerosolization, exposure levels are not known, or other circumstances where air-purifying respirators may not provide adequate protection. Dust safety masks are recommended when the dust concentration is excessive.
Eye protection	: Use of safety glasses with side shields for solid handling is good industrial practice. If this material is heated, wear chemical goggles or safety glasses with side shields or a face shield. If there is potential for dust, use chemical goggles.
Skin and body protection	: At ambient temperatures use of clean and protective clothing is good industrial practice. If the material is heated or molten, wear thermally insulated, heat-resistant gloves that are able to withstand the temperature of the molten product. If this material is heated, wear insulated clothing to prevent skin contact if engineering controls or work practices are not adequate.

Version 1.10	Revision Date 2024-06-0
	No adverse effects expected
11.2	
Information on other hazard	ds
Marlex® 9005 Polyethylene Further information	: This product contains POLYMERIZED OLEFINS. During thermal processing (>350°F, >177°C) polyolefins can release vapors and gases (aldehydes,ketones and organic acids) which are irritating to the mucous membranes of the eyes, mouth, throat, and lungs. Generally these irritant effects are all transitory. However, prolonged exposure to irritating off-gases can lead to pulmonary edema. Formaldehyde (an aldehyde) has been classified as a carcinogen based on animal data and limited epidemiological evidence.
Endocrine disrupting properties	: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.
SECTION 12: Ecological information	ation
I2.1 Toxicity	
Ecotoxicity effects	
Toxicity to fish	: Not a hazardous substance or mixture.
I2.2 Persistence and degradabil	ity
Biodegradability	: This material is not expected to be readily biodegradable.
2.3 Bioaccumulative potential Elimination information (persis	stence and degradability)
Bioaccumulation	: Does not bioaccumulate.
2.4 Mobility in soil	
Mobility	: The product is insoluble and floats on water.
12.5	
Results of PBT and vPvB as Results of PBT assessment	<ul> <li>Sessment</li> <li>This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.</li> </ul>

Endocrine disrupting properties	: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.			
12.7 Other adverse effects				
Additional ecological information	: This material is not expected to be harmful to aquatic organisms., Fish or birds may eat pellets which may obstruct their digestive tracts.			
12.8 Additional Information				
Ecotoxicology Assessment				
Short-term (acute) aquatic hazard	: This material is not expected to be harmful to aquatic organisms.			
Long-term (chronic) aquatic hazard	: This material is not expected to be harmful to aquatic organisms.			

# **SECTION 13: Disposal considerations**

## 13.1

## Waste treatment methods

The information in this SDS pertains only to the product as shipped.

Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by US EPA under RCRA (40 CFR 261) or other State and local regulations. Measurement of certain physical properties and analysis for regulated components may be necessary to make a correct determination. If this material is classified as a hazardous waste, federal law requires disposal at a licensed hazardous waste disposal facility.

# **SECTION 14: Transport information**

## 14.1 - 14.7

## Transport information

The shipping descriptions shown here are for bulk shipments only, and may not apply to shipments in non-bulk packages (see regulatory definition).

Consult the appropriate domestic or international mode-specific and quantity-specific Dangerous Goods Regulations for additional shipping description requirements (e.g., technical name or names, etc.) Therefore, the information shown here, may not always agree with the bill of lading shipping description for the material. Flashpoints for the material may vary slightly between the SDS and the bill of lading.
