

Scentinel® T Gas Odorant

Version 6.6

Revision Date 2024-06-19

According to Regulation (EC) No. 1907/2006, Regulation (EC) No. 2020/878

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Product information

Product Name Material	 Scentinel® T Gas Odorant 1127874, 1121590, 1119675, 1111642, 1108705, 1105021, 1091012, 1093286, 1098227, 1099968, 1093716, 1070716, 1086438, 1097237, 1076222, 1070717, 1084326, 1096486, 1086439, 1024792, 1024724, 1024797, 1024795, 1028520,
	1024791, 1024723, 1024794, 1024796, 1024793

EC-No.Registration number

Chemical name	CAS-No. EC-No. Index No.	Legal Entity Registration number
Tetrahydrothiophene	110-01-0 203-728-9 613-087-00-0	Chevron Phillips Chemicals International NV 01-2119489799-07-0001

1.2

Relevant identified uses of the substance or mixture and uses advised against

Relevant Identified Uses	:	Manufacture
Supported		Distribution
		Formulation
		Injection as odorant in fuels – industrial

1.3

Details of the supplier of the safety data sheet

Company	 Chevron Phillips Chemical Company LP Specialty Chemicals 10001 Six Pines Drive The Woodlands, TX 77380
Local	 Chevron Phillips Chemicals International N.V. Airport Plaza (Stockholm Building) Leonardo Da Vincilaan 19 1831 Diegem Belgium
SDS Number:100000068737	1/41

ODOR-FADE WARNING

A GAS LEAK CAN CAUSE A FIRE OR EXPLOSION RESULTING IN SERIOUS INJURY OR DEATH.

Be aware that the stenching chemical added to gas to make it detectable may not warn of a gas leak or the presence of propane or natural gas to all persons in every instance.

Instances where the odorant in an odorized gas may be undetectable include:

• Odor intensity may fade or be eliminated for a variety of chemical and physical causes, including the oxidation of rusting pipes, adsorption into or sticking onto the interior of pipes or appliances, or absorption into liquids.

• Contact with soil in underground leaks may de-odorize or remove odorant from the gas.

• Some people have a diminished ability, or inability to smell the stench. Factors that negatively affect a person's sense of smell include age, gender, medical conditions, and alcohol/tobacco usage.

- The stench of odorized gas may not awaken sleeping persons.
- Other odors may mask or hide the stench.

• Exposure to the odor for even a short period of time, may cause nasal fatigue, where a person can no longer smell the stench.

Gas detectors listed by the Underwriters Laboratories (UL) can be used as an extra measure of safety for detecting gas leaks, especially under conditions where the odorant alone may not provide an adequate warning. Gas detectors emit a loud, shrill sound when gas is present and do not depend on sense of smell. Because the odor intensity can fade or people may have problems with their sense of smell, we recommend installing, per manufacturer's instructions, one or more combustible gas detectors, in suitable locations to ensure adequate coverage to detect gas leaks.

Educate yourself, your employees, and your customers with the content of this warning and other important facts associated with the so-called "odor-fade phenomenon."

SECTION 2: Hazards identification

2.1

Classification of the substance or mixture REGULATION (EC) No 1272/2008

Flammable liquids, Category 2	H225:
	Highly flammable liquid and vapor.
Acute toxicity, Category 4	H302:
	Harmful if swallowed.
Acute toxicity, Category 4	H332:
	Harmful if inhaled.
Acute toxicity, Category 4	H312:
	Harmful in contact with skin.
Skin irritation, Category 2	H315:
	Causes skin irritation.
Eye irritation, Category 2	H319:
	Causes serious eye irritation.
Long-term (chronic) aquatic hazard,	H412:
Category 3	Harmful to aquatic life with long lasting effects.
SDS Number:10000068737	3/41

SECTION 4: First aid measures

4.1

	Description of first-aid mea	sur	res
	General advice	:	Move out of dangerous area. Show this material safety data sheet to the doctor in attendance. Material may produce a serious, potentially fatal pneumonia if swallowed or vomited.
	If inhaled	:	Consult a physician after significant exposure. If unconscious, place in recovery position and seek medical advice.
	In case of skin contact	:	If skin irritation persists, call a physician. If on skin, rinse well with water. If on clothes, remove clothes.
	In case of eye contact	:	Immediately flush eye(s) with plenty of water. Remove contact lenses. Protect unharmed eye. Keep eye wide open while rinsing. If eye irritation persists, consult a specialist.
	If swallowed	:	Keep respiratory tract clear. Never give anything by mouth to an unconscious person. If symptoms persist, call a physician. Take victim immediately to hospital.
4.2	Most important symptoms a Notes to physician	nd	effects, both acute and delayed
	Symptoms	:	No data available.
4.3	Risks Indication of any immediate	: me	No data available. edical attention and special treatment needed
	Treatment	:	No data available.
SEC	CTION 5: Firefighting measur	es	
	Flash point	:	13°C (55°F) Method: Tag closed cup
	Autoignition temperature	:	215°C (419°F)

Versi	ion 6.6		Revision Date 2024-06
			at 1.013,00 hPa Method: EU Method A.15
5.1 E	Extinguishing media		
	Suitable extinguishing nedia	:	Alcohol-resistant foam. Carbon dioxide (CO2). Dry chemical.
	Jnsuitable extinguishing nedia	:	High volume water jet.
5	Special hazards arising fro Specific hazards during fire ighting		
5	Advice for firefighters Special protective equipment for fire-fighters	:	Wear self-contained breathing apparatus for firefighting if necessary.
F	Further information	:	Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. For safety reasons in case of fire, cans should be stored separately in closed containments. Use a water spray to cool fully closed containers.
	Fire and explosion protection	:	Do not spray on a naked flame or any incandescent material. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors). Use only explosion-proof equipment. Keep away from open flames, hot surfaces and sources of ignition.
	Hazardous decomposition products	:	Carbon oxides. Sulfur oxides.

Personal precautions,	protective equipment	t and emergenc	y procedures

6.2	Personal precautions Environmental precautions	:	Use personal protective equipment. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low areas.
	•		
	Environmental precautions	:	Prevent product from entering drains. Prevent further leakage or spillage if safe to do so. If the product contaminates rivers and lakes or drains inform respective authorities.

8.2

Exposure controls Engineering measures

Adequate ventilation to control airborned concentrations below the exposure guidelines/limits. Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.

Personal protective equipment

Respiratory protection	:	If ventilation or other engineering controls are not adequate to maintain minimal oxygen content of 19.5% by volume under normal atmospheric pressure, a supplied-air NIOSH approved respirator may be appropriate. If exposure to harmful levels of airborne material may occur, a NIOSH approved respirator that provides protection may be appropriate, such as:. Air-Purifying Respirator for Organic Vapors. A positive pressure, air- supplying respirator may be appropriate if there is potential for uncontrolled release, aerosolization, exposure levels are not known, or other circumstances where air-purifying respirators may not provide adequate protection.
Hand protection	:	The suitability for a specific workplace should be discussed with the producers of the protective gloves. Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.
Eye protection	:	Eye wash bottle with pure water. Tightly fitting safety goggles.
Skin and body protection	:	Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place. Wear as appropriate:. Flame retardant antistatic protective clothing. Workers should wear antistatic footwear.
Hygiene measures	:	When using do not eat or drink. When using do not smoke. Wash hands before breaks and at the end of workday.

For additional details, see the Exposure Scenario in the Annex portion

Additional Information

Ecotoxicology Assessment

Short-term (acute) aquatic hazard Tetrahydrothiophene : Harmful to aquatic life.

Long-term (chronic) aquatic hazard Tetrahydrothiophene : Harmful to aquatic life with long lasting effects.

SECTION 13: Disposal considerations

13.1

Waste treatment methods

The information in this SDS pertains only to the product as shipped.

Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by US EPA under RCRA (40 CFR 261) or other State and local regulations. Measurement of certain physical properties and analysis for regulated components may be necessary to make a correct determination. If this material is classified as a hazardous waste, federal law requires disposal at a licensed hazardous waste disposal facility.

Product	he product should not be allowed to ourses or the soil. Do not contamina itches with chemical or used contain aste management company.	ate ponds, waterways or
Contaminated packaging	Empty remaining contents. Dispose of not re-use empty containers. Do porch on, the empty drum.	•

For additional details, see the Exposure Scenario in the Annex portion

SECTION 14: Transport information

14.1 - 14.7

Transport information

The shipping descriptions shown here are for bulk shipments only, and may not apply to shipments in non-bulk packages (see regulatory definition).

Consult the appropriate domestic or international mode-specific and quantity-specific Dangerous Goods Regulations for additional shipping description requirements (e.g., technical name or names, etc.) Therefore, the information shown here, may not always agree with the bill of lading shipping description for the material. Flashpoints for the material may vary slightly between the SDS and the bill of lading.

Scentinel® T Gas Odorant Version 6.6 Technical conditions and measures Handle substance within a closed system., Ensure operation is undertaken outdoors., Provide a good standard of general ventilation (not less than 3 to 5 air changes per hour) Organizational measures to prevent /limit releases, dispersion and exposure Locate bulk storage outdoors Conditions and measures related to personal protection, hygiene and health evaluation Wear suitable gloves tested to EN374. 2.2 Contributing scenario controlling worker exposure for: PROC3: Use in closed batch process (synthesis or formulation) Product characteristics Remarks : Liquid, vapour pressure 0.5 - 10 kPa at STP Amount used Remarks : Not applicable Frequency and duration of use Remarks : Covers daily exposures up to 8 hours (unless stated differently) Other operational conditions affecting workers exposure Remarks : Assumes a good basic standard of occupational hygiene is implemented.. Assumes use at not more than 20°C above ambient temperature, unless stated differently. Technical conditions and measures Handle substance within a closed system., Ensure material transfers are under containment or extract ventilation. Conditions and measures related to personal protection, hygiene and health evaluation Wear suitable gloves tested to EN374. 2.2 Contributing scenario controlling worker exposure for: PROC4, PROC9: Use in batch and other process (synthesis) where opportunity for exposure arises, Transfer of substance or preparation into small containers (dedicated filling line, including weighing) **Product characteristics** Remarks : Liquid, vapour pressure 0.5 - 10 kPa at STP Amount used Remarks : Not applicable

Frequency and duration of use Remarks

Remarks

: Covers daily exposures up to 8 hours (unless stated differently)

Other operational conditions affecting workers exposure

Assumes a good basic standard of occupational hygiene is implemented., Assumes use at not more than 20°C above ambient temperature, unless stated differently.

Technical conditions and measures

Ensure material transfers are under containment or extract ventilation.

Conditions and measures related to personal pro	ptection, hygiene and health evaluation
Wear suitable gloves tested to EN374.
