**SECTION 2: Hazards identification** 

# Classification of the substance or mixture This product has been classified in accordance with the hazard communication standard 29 CFR 1910.1200; the SDS and labels contain all the information as required by the standard. Classification : Combustible dust Labeling SDS Number:100000106984 2/13

in the human body or in contact with internal body fluids or tissues.

# Marlex® D163-P01 Polyethylene

While this product may not be a comb further processing or handling may for concentration in air.         Potential Health Effects         Physical Hazards       : Pellets may cause a slip hazard on hard Mechanical processing may form combu concentrations in air and thermal process temperatures may generate formaldehyd         Inhalation       : Repeated exposure to dust from this may respiratory irritation. Furmes generated during thermal process irritation of the upper respiratory tract.         Skin       : Contact with the skin is not expected to a significant irritation. Contact with the skin is not expected to a response. If this material is heated, thermal burns m Thermal burns may include pain or feelin discolorations, swelling, and blistering. Eyes         Eyes       : Contact with the eyes may cause irritatio action. Not expected to cause prolonged or sign Thermal burns may result if heated mate Ingestion         Ingestion       : Ingestion of this product present at let equal to 0.1% is identified as probable, po human carcinogen by IARC.         NTP       No ingredient of this product present at let equal to 0.1% is identified as a known or a by NTP.	Revision Date 2024-07-0				
Hazard Statements       May form combustible dust concentration while this product may not be a combot further processing or handling may for concentration in air.         Potential Health Effects       Physical Hazards       Pellets may cause a slip hazard on hard Mechanical processing may form combut concentrations in air and thermal process temperatures may generate formaldehyd inhalation         Inhalation       Repeated exposure to dust from this main respiratory irritation. Furnes generated during thermal process irritation of the upper respiratory tract.         Skin       Contact with the skin is not expected to concentrations. In some expected to concentrations. In some expected to concentration. Contact with the skin is not expected to concervations. Swelling, and blistering.         Eyes       Contact with the skin is not expected to concentration. Contact with the skin is not expected to concentration. Contact with the skin is not expected to concentration. Contact with the eyes may cause irritation discolorations, swelling, and blistering.         Eyes       Contact with the skin is not expected to concentration. Not expected to cause prolonged or sign Thermal burns may result if heated mate action. Not expected to cause prolonged or sign Thermal burns may result if heated mate action. No ingredient of this product present at leequal to 0.1% is identified as probable, por human carcingen by IARC.         NTP       No ingredient of this product present at leequal to 0.1% is identified as a known or a by NTP.         SECTION 3: Composition/Information on ingredients       Mechanical as a known or a by NTP.					
Physical Hazards       : Pellets may cause a slip hazard on hard Mechanical processing may form combu concentrations in air and thermal process temperatures may generate formaldehyd         Inhalation       : Repeated exposure to dust from this mat respiratory irritation. Fumes generated during thermal process irritation of the upper respiratory tract.         Skin       : Contact with the skin is not expected to or significant irritation. Contact with the skin is not expected to or response. If this material is heated, thermal burns may include pain or feelin discolorations, swelling, and blistering.         Eyes       : Contact with the eyes may cause irritatio action. Not expected to cause prolonged or sign Thermal burns may result if heated mate Ingestion         Ingestion       : Ingestion of this product present at le equal to 0.1% is identified as probable, po human carcinogen by IARC.         NTP       No ingredient of this product present at le equal to 0.1% is identified as a known or a by NTP.         SECTION 3: Composition/information on ingredients       Meight	<ul> <li>May form combustible dust concentrations in air.</li> <li>While this product may not be a combustible dust as sold, further processing or handling may form combustible dust</li> </ul>				
Mechanical processing may form combuconcentrations in air and thermal process temperatures may generate formaldehyd         Inhalation       Repeated exposure to dust from this matrespiratory irritation.         Furmes generated during thermal process irritation of the upper respiratory tract.       Skin         Skin       Contact with the skin is not expected to a significant irritation.         Contact with the skin is not expected to a significant irritation.       Contact with the skin is not expected to a significant irritation.         Eyes       : Contact with the skin is not expected to a significant irritation.       Contact with the skin is not expected to a significant irritation.         Eyes       : Contact with the skin is not expected to a significant irritation.       Contact with the skin is not expected to a significant irritation.         Eyes       : Contact with the eyes may cause irritatio action.       Not expected to cause prolonged or sign Thermal burns may result if heated mate ingestion         Ingestion       : Ingestion of this product present at lee equal to 0.1% is identified as probable, pot human carcinogen by IARC.         NTP       No ingredient of this product present at lee equal to 0.1% is identified as a known or a by NTP.         SECTION 3: Composition/information on ingredients       Exercise of the system or a by NTP.					
Inhalation       : Repeated exposure to dust from this matrix respiratory irritation. Fumes generated during thermal process irritation of the upper respiratory tract.         Skin       : Contact with the skin is not expected to a significant irritation. Contact with the skin is not expected to a significant irritation. Contact with the skin is not expected to a response. If this material is heated, thermal burns in Thermal burns may include pain or feelin discolorations, swelling, and blistering.         Eyes       : Contact with the eyes may cause irritation action. Not expected to cause prolonged or sign Thermal burns may result if heated mate lingestion         Ingestion       : Ingestion of this product present at lefequal to 0.1% is identified as probable, pohuman carcinogen by IARC.         NTP       No ingredient of this product present at lefequal to 0.1% is identified as a known or a by NTP.         SECTION 3: Composition/information on ingredients       Section view of the specified as a known or a by NTP.	stible dust sing at elevated				
Skin       : Contact with the skin is not expected to a significant irritation. Contact with the skin is not expected to a response. If this material is heated, thermal burns in Thermal burns may include pain or feelin discolorations, swelling, and blistering.         Eyes       : Contact with the eyes may cause irritatio action. Not expected to cause prolonged or sign Thermal burns may result if heated mate Ingestion         Ingestion       : Ingestion of this product is not a likely root the equal to 0.1% is identified as probable, point on the equal to 0.1% is identified as a known or a by NTP.         SECTION 3: Composition/information on ingredients         Component       CAS-No.	erial may cause				
Eyes       : Contact with the eyes may cause irritatio action. Not expected to cause prolonged or sign Thermal burns may result if heated mate Ingestion         Ingestion       : Ingestion of this product is not a likely rot         Carcinogenicity:       IARC         IARC       No ingredient of this product present at let equal to 0.1% is identified as probable, por human carcinogen by IARC.         NTP       No ingredient of this product present at let equal to 0.1% is identified as a known or a by NTP.         SECTION 3: Composition/information on ingredients         Component       CAS-No.	<ul> <li>irritation of the upper respiratory tract.</li> <li>Contact with the skin is not expected to cause prolonged or significant irritation.</li> <li>Contact with the skin is not expected to cause an allergic response.</li> <li>If this material is heated, thermal burns may result from contact. Thermal burns may include pain or feeling of heat,</li> </ul>				
Ingestion       : Ingestion of this product is not a likely rol         Carcinogenicity:       IARC         IARC       No ingredient of this product present at legendal to 0.1% is identified as probable, por human carcinogen by IARC.         NTP       No ingredient of this product present at legendal to 0.1% is identified as a known or a by NTP.         SECTION 3: Composition/information on ingredients         Component       CAS-No.	<ul> <li>Contact with the eyes may cause irritation due to the abrasive action.</li> <li>Not expected to cause prolonged or significant eye irritation.</li> </ul>				
IARC       No ingredient of this product present at legendal to 0.1% is identified as probable, point formation on the product present at legendal to 0.1% is identified as a known or a by NTP.         SECTION 3: Composition/information on ingredients         Component       CAS-No.       Weight					
equal to 0.1% is identified as probable, por human carcinogen by IARC.         NTP       No ingredient of this product present at lerequal to 0.1% is identified as a known or a by NTP.         SECTION 3: Composition/information on ingredients         Component       CAS-No.       Weight					
equal to 0.1% is identified as a known or a by NTP.					
Component CAS-No. Weigh	No ingredient of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.				
SECTION 4: First aid measures					
If inhaled : Move to fresh air in case of accidental ir fumes from overheating or combustion. call a physician.					
SDS Number:100000106984 3/13					

rlex® D163-P01 Pol	VO	SAFETY DATA SH
sion 1.1	ye	Revision Date 2024-0
In case of skin contact	:	If the molten material gets on skin, quickly cool in water. Seek immediate medical attention. Do not try to peel the solidified material from the skin or use solvents or thinners to dissolve it.
In case of eye contact	:	In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
If swallowed	:	Do not induce vomiting without medical advice.
TION 5: Firefighting measu	res	
Flash point	:	No data available
Autoignition temperature	:	No data available
Suitable extinguishing media	:	Water. Water mist. Dry chemical. Carbon dioxide (CO2). Foam. If possible, water should be applied as a spray from a fogging nozzle since this is a surface burning material. The application of high velocity water will spread the burning surface layer. Avoid the use of straight streams that may create a dust cloud and the risk of a dust explosion. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
Specific hazards during fire fighting	:	Risks of ignition followed by flame propagation or secondary explosions can be caused by the accumulation of dust, e.g. on floors and ledges.
Special protective equipment for fire-fighters	:	Use personal protective equipment. Wear self-contained breathing apparatus for firefighting if necessary.
Further information	:	This material will burn although it is not easily ignited.
Fire and explosion protection	:	Treat as a solid that can burn. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.
Hazardous decomposition products	:	Normal combustion forms carbon dioxide, water vapor and may produce carbon monoxide, other hydrocarbons and hydrocarbon oxidation products (ketones, aldehydes, organic acids) depending on temperature and air availability. Incomplete combustion can also produce formaldehyde.
TION 6: Accidental release	me	asures
Personal precautions	:	Sweep up to prevent slipping hazard. Avoid breathing dust. Avoid dust formation.
Environmental precautions	:	Do not contaminate surface water. Prevent product from entering drains.
Methods for cleaning up	:	Clean up promptly by sweeping or vacuum.
Additional advice	:	Dust deposits should not be allowed to accumulate on
S Number:100000106984		4/13

Version 1.1

Revision Date 2024-07-02

surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air).

## **SECTION 7: Handling and storage** Handling Advice on safe handling Use good housekeeping for safe handling of the product. Keep out of water sources and sewers. Spilled pellets may create a slipping hazard. Electrostatic charge may accumulate and create a hazardous condition when handling this material. To minimize this hazard, bonding and grounding may be necessary, but may not by themselves be sufficient. At elevated temperatures (>350°F, >177°C), polyethylene can release vapors and gases, which are irritating to the mucous membranes of the eyes, mouth, throat, and lungs. These substances may include acetaldehyde, acetone, acetic acid, formic acid, formaldehyde and acrolein. Based on animal data and limited epidemiological evidence, formaldehyde has been listed as a carcinogen. Following all recommendations within this SDS should minimize exposure to thermal processing emissions. Advice on protection Treat as a solid that can burn. Avoid generating dust; fine dust against fire and explosion dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard. Storage Requirements for storage : Keep in a dry place. Keep in a well-ventilated place. areas and containers Advice on common storage : Do not store together with oxidizing and self-igniting products.

## **SECTION 8: Exposure controls/personal protection**

#### Ingredients with workplace control parameters

#### US

Components	Basis	Value	Control parameters	Note
Nuisance Dust	OSHA Z-3	TWA	15 mg/m3	Total dust
	OSHA Z-3	TWA	5 mg/m3	(respirable dust)

Control as Particulate Not Otherwise Classified (PNOC). The ACGIH Guideline\* for respirable dust is 3.0 mg/m3 and 10.0 mg/m3 for total dust. The OSHA PEL for respirable dust is 5.0 mg/m3 and 15.0 mg/m3 for total dust.

## \* This value is for inhalable (total) particulate matter containing no asbestos and < 1.0% crystalline silica.

## Engineering measures

Version 1.1

Revision Date 2024-07-02

Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.

#### Personal protective equipment

Respiratory protection : No respiratory protection is normally required. If heated material generates vapor or fumes that are not adequately controlled by ventilation, wear an appropriate respirator. Use the following elements for air-purifying respirators: Organic Vapor and Formaldehyde. A positive pressure, air-supplying respirator may be appropriate if there is potential for uncontrolled release, aerosolization, exposure levels are not known, or other circumstances where air-purifying respirators may not provide adequate protection. Dust safety masks are recommended when the dust concentration is excessive. Eye protection : Use of safety glasses with side shields for solid handling is good industrial practice. If this material is heated, wear chemical goggles or safety glasses with side shields or a face shield. If there is potential for dust, use chemical goggles. Skin and body protection At ambient temperatures use of clean and protective clothing is : good industrial practice. If the material is heated or molten, wear thermally insulated, heat-resistant gloves that are able to withstand the temperature of the molten product. If this material is heated, wear insulated clothing to prevent skin contact if engineering controls or work practices are not adequate.

 Presumed Not Toxic

Marlex® D163-P01 PolyethyleneSkin irritation: No skin irritation

Marlex® D163-P01 PolyethyleneEye irritation: No eye irritation

Marlex® D163-P01 PolyethyleneSensitization: Did not cause sensitization on laboratory animals.

Marlex® D163-P01 Polyethylene

Further information: This product contains POLYMERIZED OLEFINS. During<br/>thermal processing (>350°F, >177°C) polyolefins can release<br/>vapors and gases (aldehydes,ketones and organic acids)<br/>which are irritating to the mucous membranes of the eyes,<br/>mouth, throat, and lungs. Generally these irritant effects are all<br/>transitory. However, prolonged exposure to irritating off-gases<br/>can lead to pulmonary edema. Formaldehyde (an aldehyde)<br/>has been classified as a carcinogen based on animal data and<br/>limited epidemiological evidence.

#### **Clean Air Act**

Ozone-Depletion : This product neither contains, nor was manufactured with a Class I or Potential Class II ODS as defined by the U.S. Clean Air Act Section 602 (40 CFR 82, Subpt. A, App.A + B).

This product does not contain any hazardous air pollutants (HAP), as defined by the U.S. Clean Air Act Section 112 (40 CFR 61).

This product does not contain any chemicals listed under the U.S. Clean Air Act Section 112(r) for Accidental Release Prevention (40 CFR 68.130, Subpart F).

This product does not contain any chemicals listed under the U.S. Clean Air Act Section 111 SOCMI Intermediate or Final VOC's (40 CFR 60.489).

#### **US State Regulations**

Pennsylvania Right To Know : No components are subject to the Pennsylvania Right to Know Act.

# California Prop. 65 : This product, as shipped, does not contain any carcinogens or reproductive toxins presently known by the State of California to cause cancer or reproductive toxicity at a level of exposure subject to the requirements of California Proposition 65.
