Do not use this material in medical applications involving brief or temporary implantation in the human body or contact with internal body fluids or tissues unless the material has been provided directly from Chevron Phillips Chemical Company LP or its legal affiliates under an agreement which expressly acknowledges the contemplated use. Chevron Phillips Chemical Company LP and its legal affiliates makes no representation, promise, express warranty or implied warranty concerning the suitability of this material for use in implantation in the human body or in contact with internal body fluids or tissues. **SECTION 2: Hazards identification** Classification of the substance or mixture GHS Classification and Labeling: Follow GB 13690, GB 15258 and GB 30000.2 to GB 30000.29 (GHS 2011) **Emergency Overview** Odor: Mild to no odor Form: Pellets Physical state: solid Color: Opaque Classification SDS Number:100000106981 2/10

Marlex® D139FK-P01 Polyethylene

Version 1.1

Revision Date 2024-07-31

Not a hazardous substance or mixture.

Labeling

Not a hazardous substance or mixture.

SECTION 3: Composition/information on ingredients

| Chemical name | | CAS-No. / EINECS-No. | Concentration [wt%] | |
|---------------------------------------|--------------|--|--|---|
| Polyethylene Hexene Cop | oolyme | r | 25213-02-9 | 99 - 100 |
| Contains no hazardous ing | gredien | ts accordir | ng to GHS. | |
| TION 4: First aid measure | es | | | |
| If inhaled In case of skin contact | | fumes fror call a phys If the molt immediate | esh air in case of accidental i n overheating or combustion sician. en material gets on skin, quic e medical attention. Do not tr om the skin or use solvents o | If symptoms persist, kly cool in water. Seek y to peel the solidified |
| In case of eye contact | : | In the case of contact with eyes, rinse immediately with plent of water and seek medical advice. | | |
| If swallowed | : Do not ind | | duce vomiting without medical advice. | |

SECTION 5: Firefighting measures

| Flash point | : | No data available | | | |
|--|---|--|--|--|--|
| Autoignition temperature | : | No data available | | | |
| Suitable extinguishing media | : | Water. Water mist. Dry chemical. Carbon dioxide (CO2). Foam. If possible, water should be applied as a spray from a fogging nozzle since this is a surface burning material. The application of high velocity water will spread the burning surface layer. Avoid the use of straight streams that may create a dust cloud and the risk of a dust explosion. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. | | | |
| Specific hazards during fire fighting | : | Risks of ignition followed by flame propagation or secondary explosions can be caused by the accumulation of dust, e.g. on floors and ledges. | | | |
| Special protective equipment for fire-fighters | : | Use personal protective equipment. Wear self-contained breathing apparatus for firefighting if necessary. | | | |
| Further information | : | This material will burn although it is not easily ignited. | | | |
| SDS Number:100000106981 | | 3/10 | | | |

| rlex® D139FK-P01 F | SAFETY DATA SHE |
|---|---|
| sion 1.1 | Revision Date 2024-07 |
| Fire and explosion protection | : Treat as a solid that can burn. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard. |
| Hazardous decomposition products | : Normal combustion forms carbon dioxide, water vapor and may produce carbon monoxide, other hydrocarbons and hydrocarbon oxidation products (ketones, aldehydes, organic acids) depending on temperature and air availability. Incomplete combustion can also produce formaldehyde. |
| TION 6: Accidental release | measures |
| Personal precautions | : Sweep up to prevent slipping hazard. Avoid breathing dust. Avoid dust formation. |
| Environmental precautions | : Do not contaminate surface water. Prevent product from entering drains. |
| Methods for cleaning up | : Clean up promptly by sweeping or vacuum. |
| Additional advice | : Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air). |
| TION 7: Handling and stora | ge |
| Handling | |
| Advice on safe handling | : Use good housekeeping for safe handling of the product. Keep out of water sources and sewers. Spilled pellets may create a slipping hazard. Electrostatic charge may accumulate and create a hazardous condition when handling this material. To minimize this hazard, bonding and grounding may be necessary, but may not by themselves be sufficient. At elevated temperatures (>350°F, >177°C), polyethylene can release vapors and gases, which are irritating to the mucous membranes of the eyes, mouth, throat, and lungs. These substances may include acetaldehyde, acetone, acetic acid, formic acid, formaldehyde and acrolein. Based on animal data and limited epidemiological evidence, formaldehyde has been listed as a carcinogen. Following all recommendations within this SDS should minimize exposure to thermal processing emissions. |
| | : Treat as a solid that can burn. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the |

| | presence of an ignition source is a potential dust explosion |

| sion 1.1 | Revision Date 2024-07- |
|--|---|
| Requirements for storage areas and containers | : Keep in a dry place. Keep in a well-ventilated place. |
| Advice on common storage | : Do not store together with oxidizing and self-igniting products. |
| CTION 8: Exposure controls | /personal protection |
| | |
| Engineering measures | |
| activities, and other substand personal protective equipme exposure to harmful levels of recommended. The user sh | ds of this material (see Section 2), applicable exposure limits, job ces in the work place when designing engineering controls and selecti nt. If engineering controls or work practices are not adequate to preve f this material, the personal protective equipment listed below is ould read and understand all instructions and limitations supplied with on is usually provided for a limited time or under certain circumstances |
| Personal protective equipr | nent |
| Respiratory protection | No respiratory protection is normally required. If heated material generates vapor or fumes that are not adequately controlled by ventilation, wear an appropriate respirator. Use the following elements for air-purifying respirators: Organic Vapor and Formaldehyde. A positive pressure, air-supplying respirator may be appropriate if there is potential for uncontrolled release, aerosolization, exposure levels are not known, or other circumstances where air-purifying respirators may not provide adequate protection. Dust safety masks are recommended when the dust concentration is excessive. |
| Eye protection | : Use of safety glasses with side shields for solid handling is good industrial practice. If this material is heated, wear chemical goggles or safety glasses with side shields or a face shield. If there is potential for dust, use chemical goggles. |
| Skin and body protection | : At ambient temperatures use of clean and protective clothing is good industrial practice. If the material is heated or molten, wear thermally insulated, heat-resistant gloves that are able to withstand the temperature of the molten product. If this material is heated, wear insulated clothing to prevent skin contact if engineering controls or work practices are not adequate. |

| Ecotoxicity effects | | | |
|---|----------------|---|--|
| Toxicity to fish | Not applicable | | |
| Toxicity to daphnia and other aquatic invertebrates | No da | ta available | |
| Biodegradability | | t: This material is not expected to be readily gradable. | |
| Elimination information (persis | nce and | degradability) | |
| Bioaccumulation | Does | not bioaccumulate. | |
| Mobility | The p | roduct is insoluble and floats on water. | |
| Additional ecological information | organ | naterial is not expected to be harmful to aquatic isms., Fish or birds may eat pellets which may obstruct ligestive tracts. | |
| Ecotoxicology Assessment | | | |
| Short-term (acute) aquatic hazard | This p | roduct has no known ecotoxicological effects. | |
| Long-term (chronic) aquatic hazard | This p | roduct has no known ecotoxicological effects. | |
| | | | |

SECTION 13: Disposal considerations

The information in this SDS pertains only to the product as shipped.

Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by US EPA under RCRA (40 CFR 261) or other State and local regulations. Measurement of certain physical properties and analysis for regulated components may be necessary to make a correct determination. If this material is classified as a hazardous waste, federal law requires disposal at a licensed hazardous waste disposal facility.

SECTION 14: Transport information

The shipping descriptions shown here are for bulk shipments only, and may not apply to shipments in non-bulk packages (see regulatory definition).

Consult the appropriate domestic or international mode-specific and quantity-specific Dangerous Goods Regulations for additional shipping description requirements (e.g., technical name or names, etc.) Therefore, the information shown here, may not always agree with the bill of lading shipping description for the material. Flashpoints for the material may vary slightly between the SDS and the bill of lading.

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

| ۴ | Key or legend to abbreviations and a | cronyms use | d in the safety data sheet |
|--------|--|-------------|--|
| ACGIH | American Conference of Government Industrial Hygienists | LD50 | Lethal Dose 50% |
| AIIC | Australian Inventory of Industrial Chemicals | LOAEL | Lowest Observed Adverse Effect Level |
| DSL | Canada, Domestic Substances List | NFPA | National Fire Protection Agency |
| NDSL | Canada, Non-Domestic Substances List | NIOSH | National Institute for Occupational Safety & Health |
| CNS | Central Nervous System | NTP | National Toxicology Program |
| CAS | Chemical Abstract Service | NZIoC | New Zealand Inventory of Chemicals |
| EC50 | Effective Concentration | | No Observable Adverse Effect Level |
| EC50 | Effective Concentration 50% | NOEC | No Observed Effect Concentration |
| EGEST | EOSCA Generic Exposure Scenario Tool | OSHA | Occupational Safety & Health Administration |
| EOSCA | European Oilfield Specialty Chemicals Association | PEL | Permissible Exposure Limit |
| EINECS | European Inventory of Existing Chemical Substances | PICCS | Philippines Inventory of Commercial Chemical Substances |
| MAK | Germany Maximum Concentration Values | PRNT | Presumed Not Toxic |
| GHS | Globally Harmonized System | RCRA | Resource Conservation Recovery Act |
| >= | Greater Than or Equal To | STEL | Short-term Exposure Limit |
| IC50 | Inhibition Concentration 50% | SARA | Superfund Amendments and Reauthorization Act. |
| IARC | International Agency for Research on Cancer | TLV | Threshold Limit Value |
| IECSC | Inventory of Existing Chemical Substances in China | TWA | Time Weighted Average |
| ENCS | Japan, Inventory of Existing and New Chemical Substances | TSCA | Toxic Substance Control Act |
| KECI | Korea, Existing Chemical Inventory | UVCB | Unknown or Variable Composition, Complex Reaction Products, and Biological Materials |
| <= | Less Than or Equal To | WHMIS | Workplace Hazardous Materials Information System |
| LC50 | Lethal Concentration 50% | ATE | Acute toxicity estimate |
